

libk\_header/basic/kmemory.hpp

```
graph BT; A[kernel_src/kernel.cpp] --> B[libk_header/basic/kmemory.hpp]; C[libk_src/basic/kmemory.cpp] --> B;
```

The diagram illustrates a header file structure. At the top is a gray box containing the header file path `libk_header/basic/kmemory.hpp`. Below it are two white boxes: `kernel_src/kernel.cpp` on the left and `libk_src/basic/kmemory.cpp` on the right. Two blue arrows point from the top of each white box to the bottom of the gray box, indicating that both source files include the header file.

kernel\_src/kernel.cpp
